## Stainless steel pedestrian tripod turnstile

**TTS230**

\* All measurement are in cm.

**TTS260**

**TTS210**

Mechanical drive unit eliminate the use of expensive electric motor and reduce maintenance cost.

Turnstile can be configured to be bi-directional or uni-directional. Built in acrylic plate for easy integration with other devices.

If arm rotated more than half, it will auto-rotate to the next idle position. If arm rotated less than half, it will auto-rotate back to the current idle position.

Anti-tailgating. Smart lock mechanism effectively allow only one person to pass through at a time.

During power failure, arm will drop automatically allowing free pass through. Internal parts inside housing is key locked to avoid tampering.

Built in LED to indicate direction. Once unlock, arm just need to be pushed lightly to rotate therefore even elderly or children are able to use the turnstile.

Secure

Easy reader intergration

Safe, emergency escape

Versatile

User friendly

Innovative design

All tripod length are 52cm

### Technical specification:

Description	Specification
Power supply	AC220V $\pm$ 10V
Power consumption	25 Watt
Passage width	60 cm
Response time	0.2 sec
Pass speed	30 person per min
